DAVID OLAGBENRO

ICT SPECIALIST

Abuja, Nigeria | (234) 903-900-5265 | davidolagbenro35@gmail.com

SUMMARY

IBM Certified ICT Professional with 6+ years of experience in the **humanitarian sector, health sector, government , private, FMCG, Solar Energy, Chemical Industry and Tech**. Expert in tier 1-4 technical support, LAN/WAN administration, information security, website/mobile app development. Expert in disaster recovery planning, end-to-end equipment management, and monitoring GSM, satellite, and radio communication services. Adept at combining technical expertise with rights-based communication and digital engagement, and content analysis.

PROFESSIONAL EXPERIENCE

IT & Communication Specialist | RedAid Nigeria (Non-Profit) **Enugu, Nigeria | June 2024 – Present**

RedAid Nigeria (a subsidiary of German Leprosy Relief Association) focuses on eliminating diseases and empowering excluded communities.

- Developed and launched the RedAid website (WordPress/custom code) and a Mental Health Assessment System web version.
- Produced the award-winning "Surviving TB" documentary (200k+ views) as part of World TB Day campaign
- Implemented Disaster Recovery Plans, manage OneDrive/NAS backups, and oversee cybersecurity protocols (antivirus/vulnerability assessments)
- Implemented IDS and IPS network firewall controls to protect organizational systems and data. Produced an incident response protocol and developed **IT Policy Framework v1** to guide security governance.
- Led a team of network engineers to establish satellite internet connectivity using Starlink, including full system deployment, configuration, and optimization to provide reliable high speed connectivity across the organization.

ICT Specialist | Diverse Health Initiative (DHI) **Abuja, Nigeria | 2023 – 2024**

A non-profit championing the rights of people with disabilities. **Remote**

- ICT asset lifecycle management and telecommunication oversight by optimizing the Equipment Tracking System (ETS) and enforcing rigorous SLA compliance for satellite, radio, and GSM services.
- Architected a secure VPN framework, providing field officers with seamless, encrypted remote access to critical resources.
- Advanced the organization's cybersecurity posture by developing a custom Azure-integrated phishing-debug API and orchestrating simulated phishing environments, which significantly reduced the vulnerability window to social engineering threats through hands-on staff training

Chief Technology Officer | Flowcode Technology Hub Limited **Port Harcourt, Nigeria | 2024**

Technology company

- Led and supervised Software Development, Operations, and Technology teams, ensuring successful delivery of business and technical objectives.
- Defined and executed the company's technology strategy, aligning digital solutions with organisational growth and operational goals.
- Managed end-to-end software development lifecycles, infrastructure, system deployments, and technology operations.
- Mentored developers, engineers, and technical staff while delivering technical training and mentorship programmes for students and aspiring professionals.

IT Support Engineer | Cen Global Services Limited **Port Harcourt, Nigeria | 2022 – 2024**

A global group specializing in maritime services, facility maintenance, and transportation.

- Designed, developed, and maintained responsive web applications and corporate websites using modern web technologies.
- Configured and supported enterprise network infrastructure, including LAN/WAN, VPN connectivity, routing, switching, and network security.
- Performed functional, regression, and user acceptance testing (UAT), identifying software defects and collaborating with developers to improve application quality.
- Managed web hosting environments, domain administration, SSL certificates, server deployments, and ongoing performance optimization.

IT Intern | Head of Service of the Federation, Nigeria (OHCSF) **Abuja, Nigeria | 2021-2022**

Governement Office

- Provided first-line IT support for staff, resolving hardware, software, and network-related issues.
- Installed, configured, and maintained computer systems, printers, and peripheral devices.
- Assisted with network administration, user account management, and system maintenance.
- Supported data management, software installations, and routine system updates to ensure operational efficiency.
- Participated in troubleshooting, documentation, and IT infrastructure support while adhering to organisational IT policies and security standards.

EDUCATION

Masters, Information Technology **2025 - 2027**

National Open University (NOUN)

- Information Systems Design

Bachelor of Information Communication Technology & Management **2017 - May 2021**

Iscom University

- Major in Information Technology (IT)
- Minor in Management

TECHNICAL SKILLS

Infrastructure: LAN/WAN/TCP/IP, Active Directory, Hyper-V virtualization, and Windows/Linux Server administration

Software & Mobile Development: Full Stack Web & Mobile Development, Python, WordPress, and custom coding for complex systems.

UI/UX & Graphics Design: UI and UX, graphics, digital branding for reports and communication using Canva, Adobe Photoshop, CapCut, and Figma.

Cybersecurity & Data Protection

Ethical hacking, digital forensics, vulnerability assessment, disaster recovery, secure backups with Microsoft OneDrive and NAS.

Telecommunications

Monitoring and managing GSM, Satellite, Internet, and Radio communication services/SLAs

IT Operations & Support:

Tier 1 to 4 support, Microsoft Azure, Microsoft Entra ID, Microsoft Exchange, Microsoft 365, APIs, QuickBooks, Zoho.

The Union World Conference on Lung Health 2026, Rio de Janeiro, Brazil
Accepted E-Poster Presenter | November 2026

From Thousands to Zero: Artificial Intelligence as a Disruptive Force in Tuberculosis Health Communication. A Case Study from RedAid Nigeria's DAHW Project (2024 to 2026)

• Selected for presentation at The Union World Conference on Lung Health 2026 after peer review from 2,993 global abstract submissions.
• Presented findings on the application of Artificial Intelligence to strengthen tuberculosis health communication, community engagement, and public health awareness within the RedAid Nigeria DAHW Project.
• Demonstrated the impact of AI driven communication strategies in supporting TB prevention, knowledge dissemination, and program implementation across underserved communities.
• Published in the official Conference Abstract Book of The Union World Conference on Lung Health 2026.

PORTFOLIO

Software Devlopment

- https://github.com/

This is a web scraping bot that automates the process of job applications on LinkedIn

Graphics Design

- https://drive.google.com/drive/

A collection of design works for events, activities, annual reports, and other communication materials.

AI Developement

- https://github.com/StaticMinus

A collection of AI Vibe-coded projects, advancing health and technology.

"Developed over a dozen websites for NGOs and private organizations. Working with AI agents to improve healthcare service delivery through cost-effective digital solutions."
